Dear Uncountable Hiring Team,

I'm excited about the opportunity to join Uncountable as a Product Manager. With a strong foundation in both product management and full-stack development, I bring a unique ability to bridge technical and strategic needs seamlessly. As a AI Product Consultant to a startup, I developed a GenAI-powered pitch deck analyzer (thesprintfit.com) using Flask and PostgreSQL, where I led the end-to-end process - from ideation and feature prioritization to deployment - creating a tool focused on speed and user impact.

In previous roles, I've led cross-functional teams, like guiding a 9-member tech group at Mastercard, to enhance onboarding processes - achieving a fivefold increase in weekly user adoption. I'm eager to bring this blend of technical know-how and product insight to help drive Uncountable's platform forward for Fortune 500 clients.

Thank you for considering my application.

I live in San Francisco and will be available to interview at your SF office on-site if required.

Best,

Akshay Danthi
