SUMMARY

Evaluation-driven AI Product Manager with hands-on experience building 0-to-1 and scaled GenAI products that turn unstructured information into better decisions. Combines product strategy, technical depth, and AI evaluation rigor across LLMs, RAG, and Agentic systems to improve decision quality, trust, and operational efficiency.

PROFESSIONAL EXPERIENCE

AI Product Manager

Oct 2025 - Present

TheSprintFit LLC

- Led 0-to-1 launch of an AI investment analysis and founder-investor matching platform, using **agentic workflows** to automate pitch-deck screening and fit scoring, **cutting evaluation time by ~70%** and reducing deal review from hours to minutes.
- Owned **product strategy** and **roadmap** for **AI-assisted investment screening**, partnering with founders and analysts to translate VC deal-flow pain points into match-scoring and thesis-fit features that improved speed, consistency, and decision quality.
- Defined and executed an evaluation strategy for GenAI pitch-deck analysis using RAG and quality gates, improving **grounding accuracy by 34%** and reducing **factual inaccuracies by 62%** to strengthen trust in investment screening.

AI Product Manager

Sep 2024 - Oct 2025

Majorly Inc.

- Launched Ana, an AI career advisor that delivered personalized career prep recommendations and answered student questions, **saving advisors 10 hrs/week** and boosting adoption from **24% to 52%** across paying orgs.
- Identified UX gaps in realism and latency across interview practice tools and led a cross-functional team to launch a real-time interview simulator, driving a **20% WAU lift in 6 weeks** and converting **3 pilots** into paid customers.
- Shipped a self-serve GenAI analytics feature that turned plain-English questions from career advisors into instant insights on student product interaction data, cutting report turnaround from **1-2 days to minutes**.

Product Manager

Sep 2021 - Sep 2023

Mastercard

- Scaled issuer onboarding **throughput by 5x**, from **10 to 50+** organizations per week, on Mastercard's payment configuration platform by using product analytics to identify funnel bottlenecks and streamline onboarding at scale.
- Owned roadmap execution for low-friction card program configuration, **aligning 15+ global stakeholders** with distinct business and regulatory requirements, while leading a 9-person cross-functional team to ship iterative releases that achieved **85% CSAT**.
- Defined the prioritization strategy to accelerate platform adoption, sequencing onboarding for 6 high-impact teams including Tokenization, Risk Analytics, and Loyalty based on **business value, operational friction, and readiness**.

Business Analyst

Nov 2019 - Sep 2021

HSBC

- **Defined business & regulatory requirements for modernization** of HSBC's payments platform across the UK and Saudi Arabia, supporting a shift toward microservices architecture and new payment capabilities such as digital signature.
- Partnered with cross-functional stakeholders to roll out payment enhancements, improving scalability and compliance while **reducing overhead costs by 10%**.

Software Engineer

Nov 2017 - Nov 2019

Lloyds Banking Group

- Optimized Java and Oracle SQL payment systems handling **100K+** daily transactions, **reducing latency by 30%**.

EDUCATION & CREDENTIALS

M.S. in **Business Analytics**

Golden Gate University (Sep 2023 - Sep 2024)

B.E. in **Computer Science**

Anna University (Aug 2013 - Aug 2017)

SKILLS

AI and ML: GenAI (RAG, agent orchestration, vector search), prompt engineering, fine tuning, model evaluations (LangFuse, Galileo, Arize), failure modes identification, responsible AI, MLOps, LLM product strategy.

Technical: Python (LangGraph, ADK, Semantic Kernel, CrewAI), SQL, Tableau, Model Context Protocol (MCP), cloud platforms (AWS, Azure), REST APIs, vector databases (Pinecone, Weaviate, FAISS), Claude Code, n8n

Product management and strategy: Product discovery, PRDs, roadmap and prioritization, KPI definition, go to market strategy, stakeholder management, leadership, cross functional alignment, design, data, and business.

Product analytics and experimentation: A/B testing, event tracking, PostHog, Amplitude, Mixpanel.

Research and UX: User research, market research, problem framing, journey mapping, wireframes, and prototypes.

CERTIFICATION

- Certified [AI/ML Product Management](#) (AI Product Strategy, LLMOps, Pricing GenAI models) - PMExercises
